

Challenge

Develop a Responsive Web Page Using Modern CSS

Challenge

- Develop a responsive web page for an event management company

Develop a Responsive Web page for an Event Management Company

The Online Design Conference is a two-day event that is conducted by an event management company. The conference is designed for web developers, web designers, and marketing professionals who want to learn about the latest design trends and strategies. The conference features keynote speeches, panel discussions, and workshops.

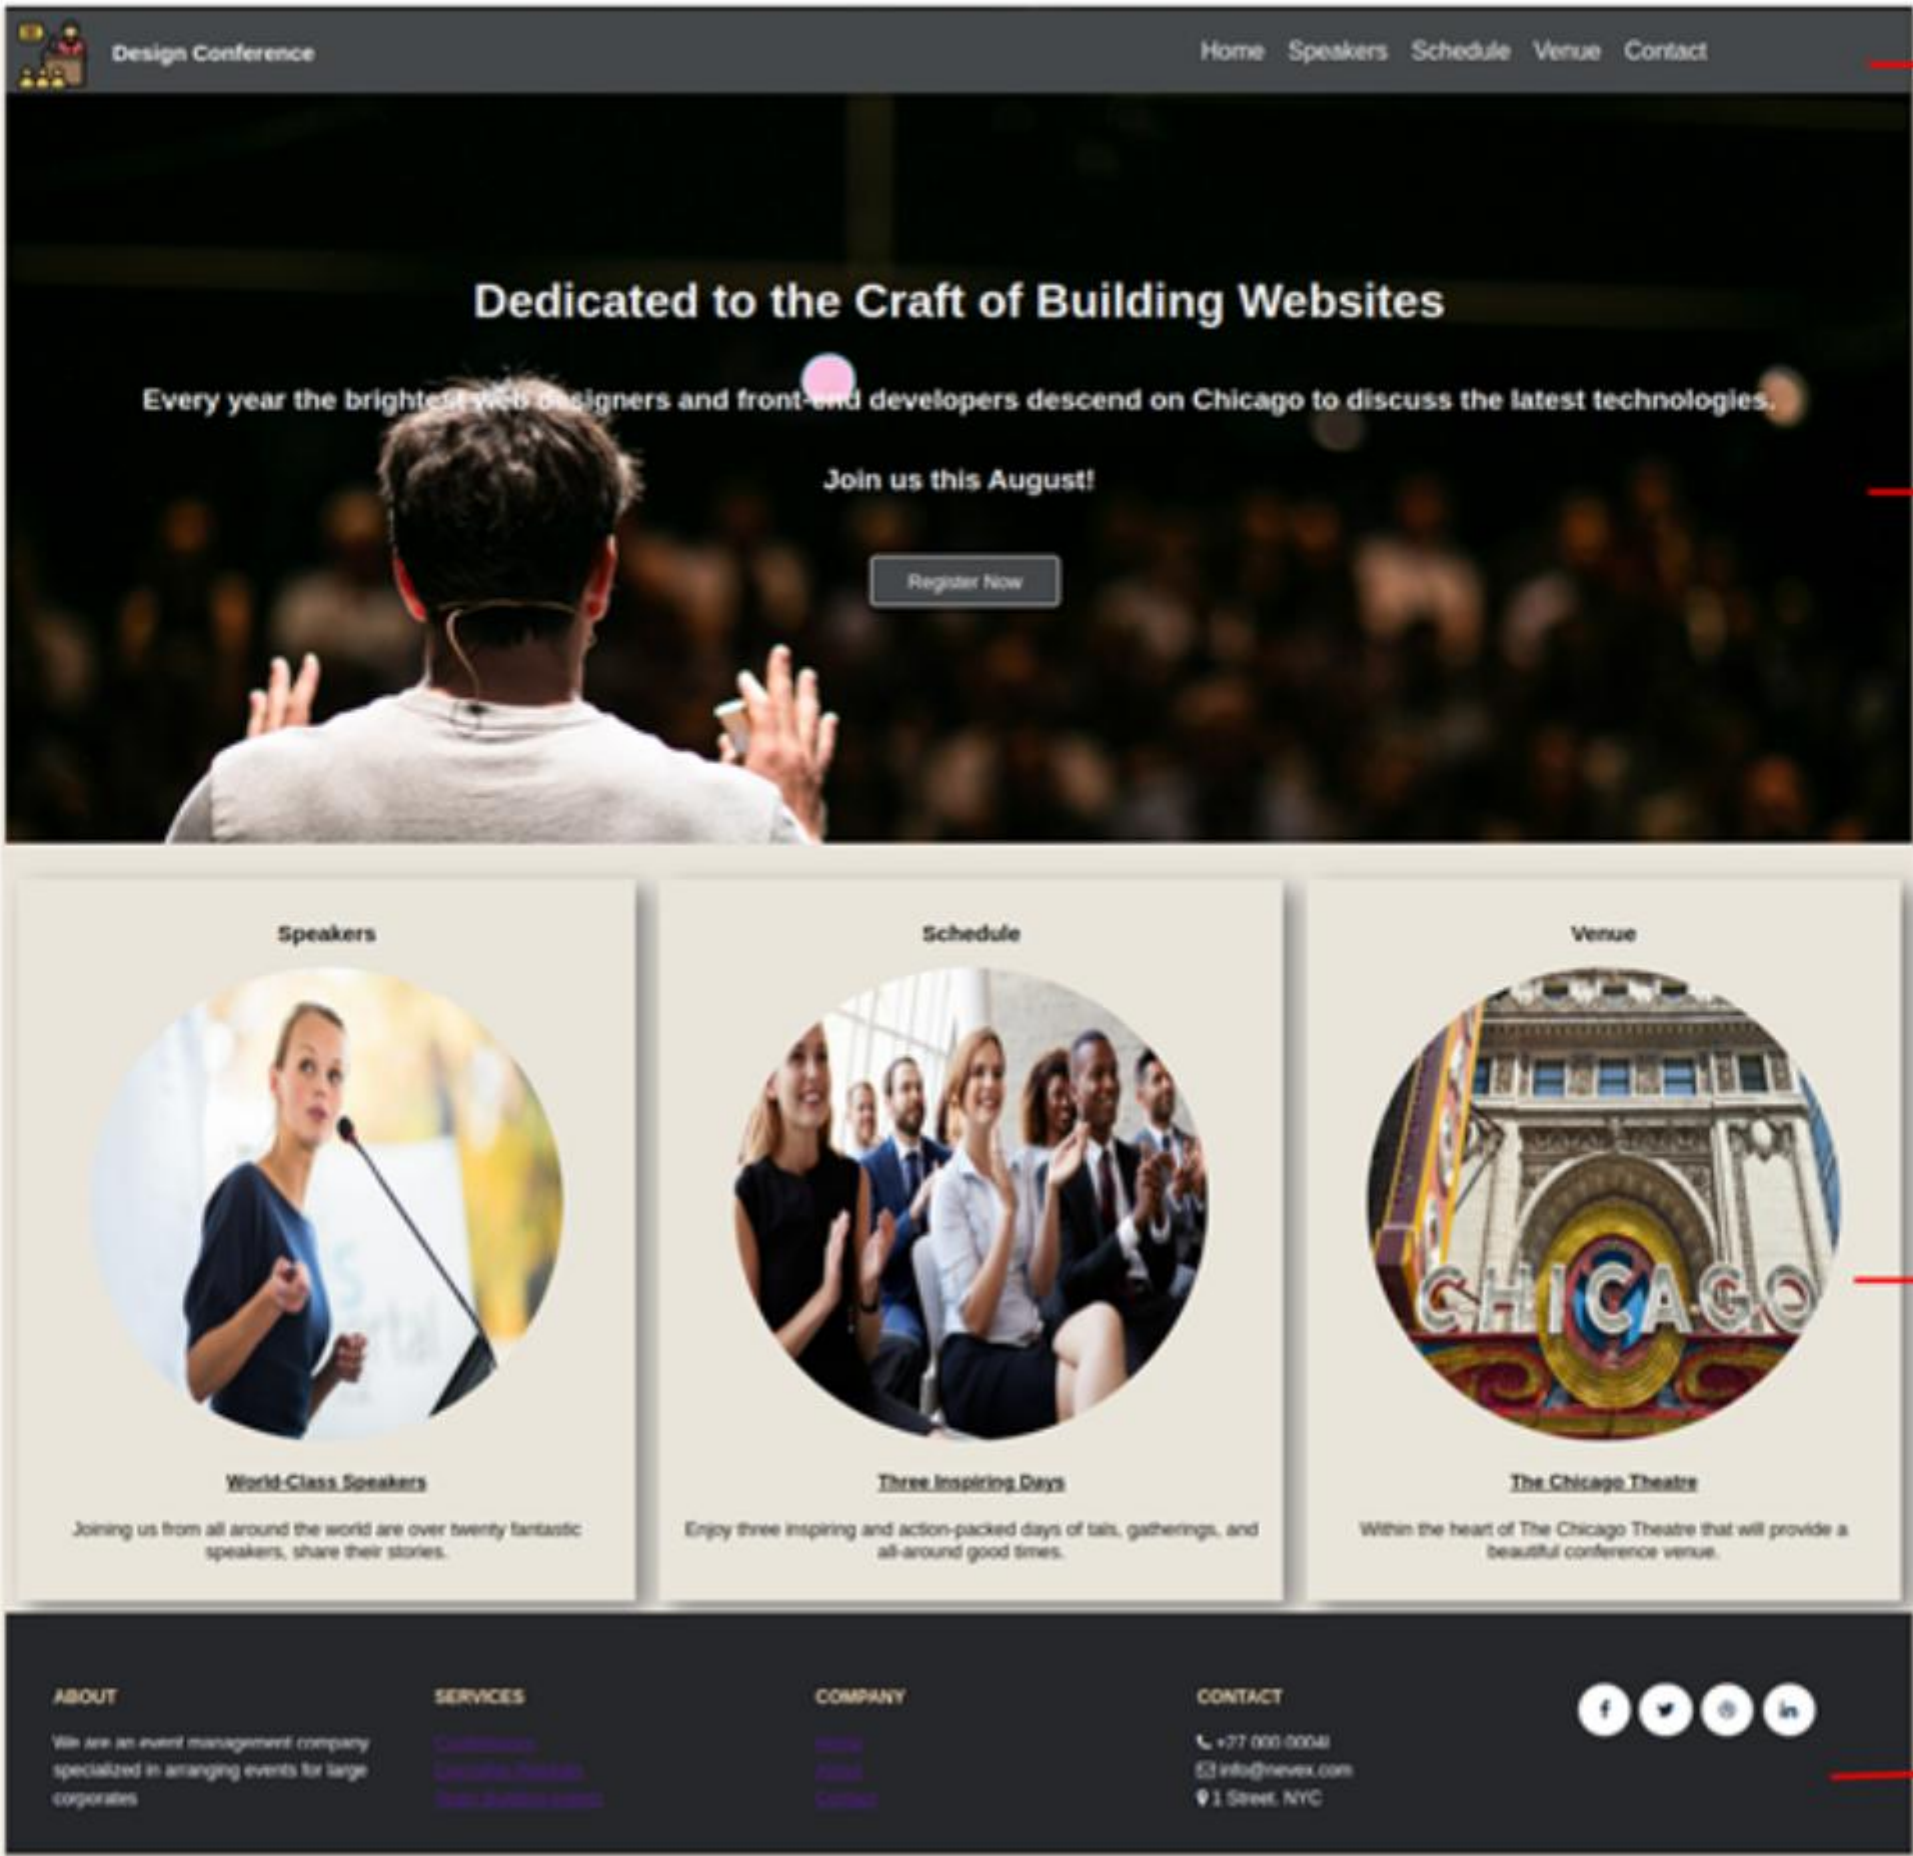

Create a responsive web page for an event management company so that the users can use it on a mobile or desktop device.

CHALLENGE

Expected Output: Desktop View

[Click here](#) for the desktop view of the web page for better clarity.

Header with nav bar

Single column hero unit

Main section with three columns

Footer with social media links

Expected Output: Mobile View

[Click here](#) for the mobile view of the web page for better clarity.
