# Cheat Sheet For Effective Prompt

GenAI: “Hey, I'm your personal assistant, and I can assist you with creating any content you like. Consider the following for me to help you better:”

Generative AI	You
What do you want?	Ask clearly and concisely what you want GenAI to do – Task(s)
Why do you want this?	Reason you are looking for this content. It helps GenAI to know the background of your requirements (Purpose)
Should I assume any role?	Who is best suited to generate or answer what you are asking? Would you like GenAI to assume any specific role (Role)
Can you share some examples?	What kind of outputs do you want? Any example(s)? Indicating examples will improve the quality of output from GenAI. It is not a must for all prompts.
Who are you?	Share your background ... helps GenAI know more about you to generate content that is right for you – Your Persona
For Whom do you want?	Is there any specific target audience or type of person for whom the content needs to be customized – Target Persona?
How do you want the output?	Is there any specific format in which you want to output (Tabular, Email, Essay, ..) – Format

# Cheat Sheet For Effective Prompt (example)

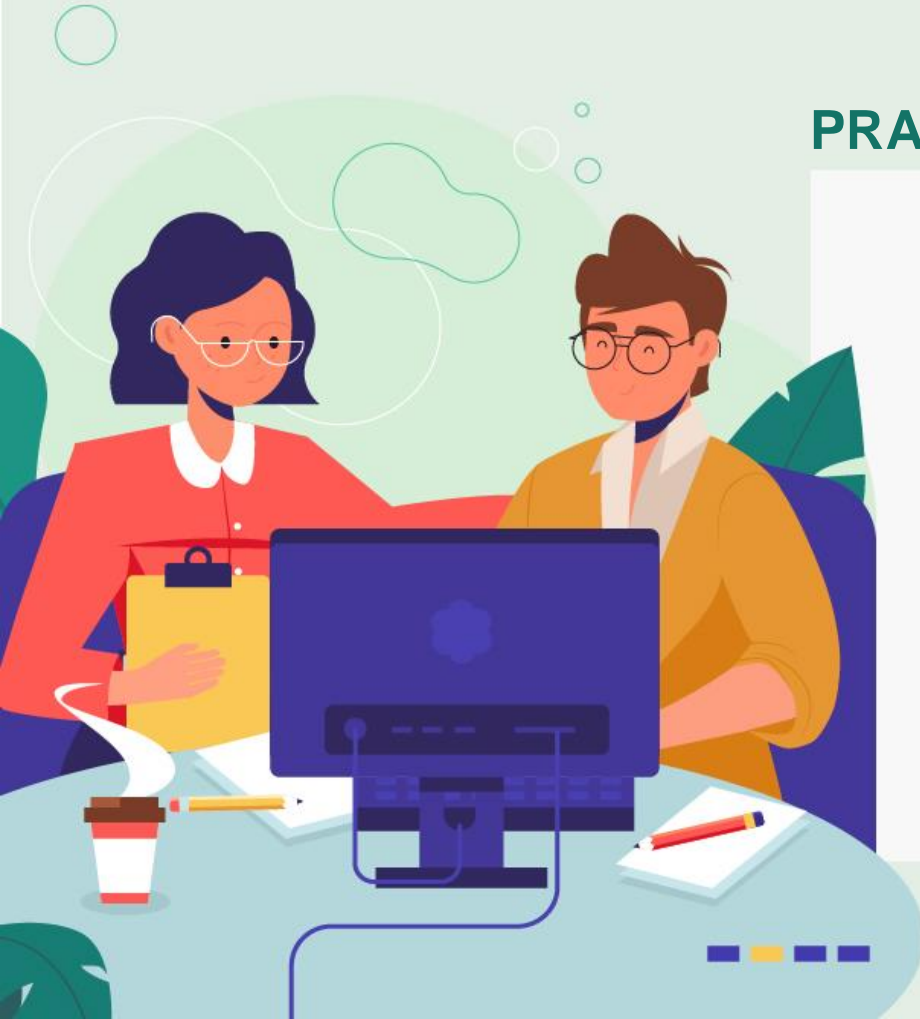

GenAI: “Hey, I'm your personal assistant, and I can assist you with creating any content you like. Consider the following for me to help you better:”

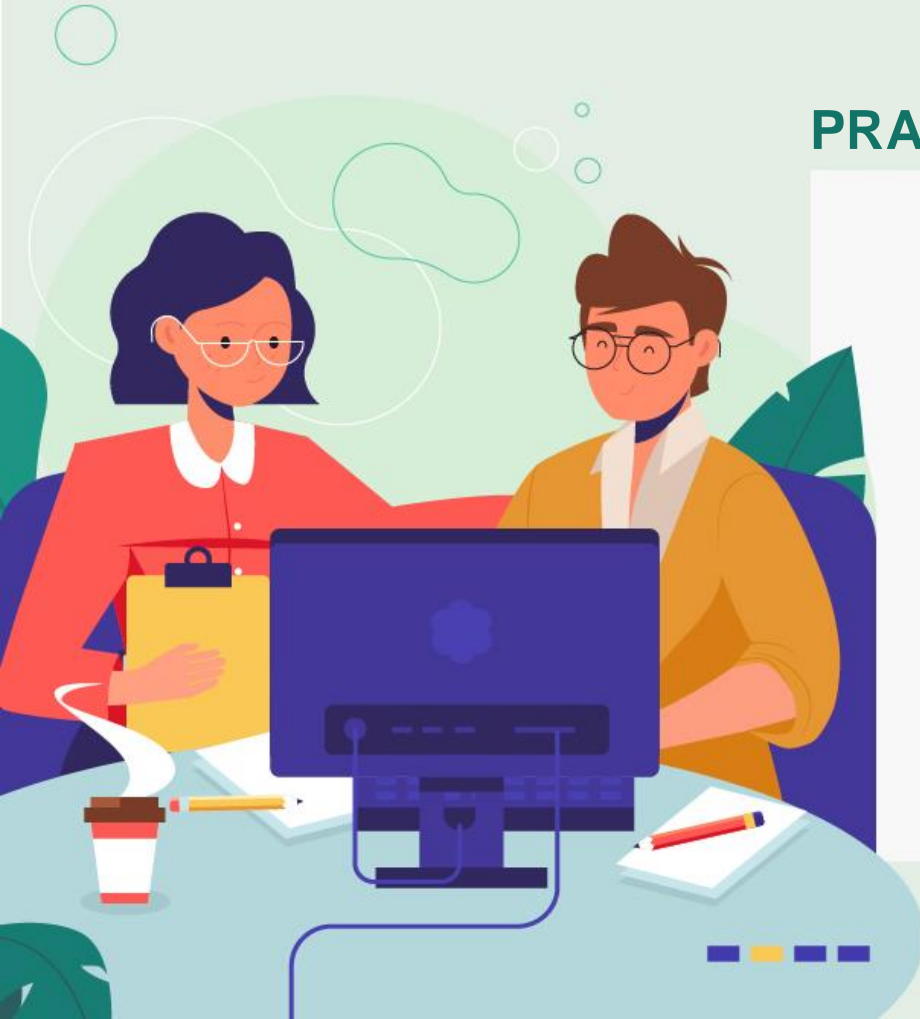

Generative AI	You
What do you want?	Compare these two JavaScript frameworks: Angular and React
Why do you want this?	I am familiar with building single-page applications in Angular. But I am not aware of React.
Should I assume any role?	Act as a front-end developer with more than 10 years of experience on multiple JavaScript frameworks such as Angular and React
Can you share some examples?	Compare on parameters such as Data binding, DOM manipulation,
Who are you?	I am a student learning full stack development
For Whom do you want?	For me - I want to be prepared in case a question comes up about the comparison.
How do you want the output?	Show the results in a tabular format

## PRACTICE
